European Communities of Facilitators focused on Co-creation training, Networking and Hands-on learning

Passionate about collaboration?
Join our Community of Expert Facilitators today!

eufficient.eu

OBJECTIVE

The main objective of EU.FFICIENT is to create, pilot and validate Communities of Expert Facilitators to improve co-creation processes in Europe, with a focus on personalised training, networking and hands-on learning.

WHAT ARE EXPERT FACILITATORS

Expert Facilitators are skilled individuals who help different groups, called Co-creators, work together effectively. They can be found in Higher Education Institutions, Research and Technology Organisations, innovation clusters, and other places. Their roles can include Technology Transfer Officers, Business Liaison Officers, and more. They also work in companies and public organisations like municipalities. Co-creators are people from academia, industry, or the public sector who benefit directly from collaboration

COMMUNITIES OF EXPERT FACILITATORS

Four Communities of Expert Facilitators will be piloted: Advanced Manufacturing, Mobility, HealthTech and AI/Digital, allowing for cross-fertilisation and effective cross-comparison between them.

Advanced Manufacturing: Combines automation, robotics, AI and IoT for efficient production

HealthTech: Integrates technology with healthcare to improve patient outcomes and reduce costs

Mobility: Includes mobility advancements like incorporating electric vehicles, self-driving systems and connected platforms

AI/Digital: Consists of technological advancements like driving automation, process optimization and informed decision-making in industries

EU.FFICIENT ONLINE PLATFORM

- Customised Training: specialised training program aimed at enhancing co-creation skills (e.g. technical/soft skills, innovative co-creation methodologies, training on SSH and GEDI)
- Knowledge sharing and networking: library of co-creation resources, thematic webinars, hotline support, networking tool, chat, matchmaking
- Hands-on application of knowledge: challenges for each community launched by both industry and public sector
